PROJECTS

Rock paper scissors game:

Web-based interactive rock, paper and scissors game made using JavaScript, HTML and CSS where you pick a move and the computer picks a random move following an algorithm. The scores are recorded and displayed accordingly and JSON is used to store the data locally.

Simple movie viewing app:

A simple movie viewing app made using ReactJS and CSS. Movies are fetched using API where search features are also available. Movies can be marked as favorites and viewed in another page.

My Portfolio – (ongoing):

Currently developing a personal portfolio web application using Next.js, TypeScript, and Tailwind CSS to showcase projects and skills, with a focus on responsive design, performance, and continuous improvement.
